

ONYX GHOST

Short Description

ONYX Ghost is a premium flexible tattoo film developed for tattooed areas where traditional tattoo films often struggle. Its unique matte finish and highly flexible construction make it ideal for knees, elbows, hands, necks and other challenging areas of the body.

Full Description

ONYX Ghost is a next-generation premium tattoo film developed specifically for areas of the body that require maximum flexibility and comfort.

Unlike traditional tattoo films, Ghost features a unique matte surface and an exceptionally flexible structure that adapts naturally to body movement. This makes it an ideal professional second skin solution for knees, elbows, hands, fingers, necks, ankles and other difficult-to-cover areas.

The advanced construction allows the film to move comfortably with the skin while maintaining reliable adhesion and professional tattoo protection.

Developed for modern tattoo artists who demand more from their tattoo protection products, Ghost combines flexibility, comfort and performance in a format specifically designed for challenging placements.

Whether used on highly mobile body parts or simply when maximum comfort is required, ONYX Ghost delivers a premium tattoo protection experience unlike traditional tattoo films.
